

Use of a ladder for the installation of Pulley

The use of a ladder for example can involve individual action. Here are the steps to follow for the usage.

1. Analysis of locations and field.
2. Positioning and deploying of the ladder: Inspection of land stabilization, fix the ladder.
3. Installation of the lifeline: attach the lifeline on the pole, and then deploy the pole and anchor the pole top by passing the loop around the pole.
4. Visual check of the harness and equipment.
5. Fixing the slide on the lifeline and harness.
6. Ascending the ladder: fixing the top of the ladder on the pole, set up anchoring point for a stop positioning of lanyard around the pole.
7. Installation of a pulley.

You have all the information necessary for the use of a ladder and the installation of pulley in the best conditions.
